

Nafpaktos Textile Industry S.A. acknowledges its responsibility and obligations towards natural and human environment and **envisions** the creation of a company whose name will become synonymous with high quality cotton yarn, produced with respect to the environment.

To this end, Nafpaktos Textile Industry S.A. implements an Environmental Management System (EMS) in accordance with EN ISO 14001: 2015 International Standard and all applicable regulatory requirements.

Moreover, Nafpaktos Textile Industry S.A. is **committed to**:

- Protect the environment and prevent or reduce pollution from its activities
- Continuously improve its environmental performance and its Environmental Management System
- Minimize environmental impacts, tackle climate change, protect biodiversity and save natural resources throughout its products' life cycle
- Comply with all applicable regulatory requirements and other requirements that the company has accepted

The EMS of Nafpaktos Textile Industry S.A., covers the following activities:

Production, Storage and Trading of Cotton Yarn

and aims to identify the environmental aspects of its activities and develop processes and programs to continuously improve company's environmental performance.

More specifically Nafpaktos Textile Industry S.A. has established the following Environmental **OBJECTIVES**:

- Save natural resources by developing a monitoring system for their consumption
- Treat all solid and liquid waste produced, giving priority to their reuse and recycling
- Continuous awareness and training of staff on Environmental Issues

This Environmental Policy is published and communicated to all interested parties, while it is implemented and supported by all Nafpaktos Textile Industry S.A. employees.

BoD Chairman
Vasileios Polychronos
